2 Introduction

This document is intended to give an update of this project's progress, until this date. Its main goal is to report that the project is progressing according to the initial plan, previously stated in the project's proposal.

The report will also state the issues encountered during this time period, mentioning the decisions the group chose to solve them. This will also include changes in the accorded initial plan, that the group found relevant for the project's progress efficiency.

The diagrams and schemas developed for this project are disposed in the report's appendix, having references pointing to them when approaching a related topic.

3 Project's Roadmap

According to the proposed plan, the group managed to fulfill almost all the objectives that were planned to be accomplished by this time - a relational database, a working HTTP server and a prototype Android application that can make requests to the previously stated server and use its information to display lists and detailed views.
